

A&S Edible Oil Mill is a fast emerging name as a manufacturer of fine quality Banaspati / Cooking Oil and industrial fats on the industrial horizon of Pakistan. The manufacturing facilities are located in Korangi Industrial Area and Port Qasim Authority, Karachi-Pakistan. The plant envisages per day capacity to produce 300 Tons of Banaspati / Cooking Oil and 100 Tons of Industrial Fats. Professional expertise, commitment and quality consciousness brought ultimate fruits and presently the brand "TAAZA" is known as high quality Banaspati / Cooking Oil and Industrial Fats, available in all major cities of Pakistan at competitive rates.

Every great journey of the human history started from a first small step. This was the saying, which motivated and inspired us to establish a Cooking Oil, Banaspati, Vegetable Oil and Fat industry. The aim was to provide excellent quality product to the common market at very reasonable and competitive prices.

A&S Edible Oil Mill has become a known business house in Pakistan at very early age attributable to professional and market oriented approach of the management. The management is confident that by providing quality food items to the public, the business will constantly grow with the passage of time. Capturing the market as well as satisfying our clients with fine quality and assurance will be our foundation to success.

Here at A&S we make an endless variety of products, from commercial to industrial. All our products are fully lab tested in according to the International Standards of Edible Vegetable Oil and Fats. Our production team strives to make the best quality of oil and fats.

Taking on challenges and innovations, A&S is a strong production house that can produce almost anything in the vegetable oil and fat field. Catering the needs of a huge clientnetwork, we specialize in the following products.
